

## CORY SIMMONS

Frontend Developer

resume.cory@mailhero.io

(910) 538-2606

I make lots of tools on GitHub; write for a plethora of publications; and speak at conferences from time-to-time.

I'm looking for a full-time remote job as an entry-to-mid level frontend developer working with ES6+ and React. You shouldn't waste your time reading much further if you're looking for a senior React developer.

You should hire me if your company promotes mentorship; loves using great tools; and would value a long-term, hard-working, problem solver.

---

I'm **fluent** in design, typography, HTML5, CSS3, preprocessors, PostCSS, Photoshop, Illustrator, jQuery, JavaScript (ES6+), WordPress, Node.js, and frontend performance.

I'm **decent** at Express, Express APIs, React, database interaction, and Rails.

I'm **interested** in becoming a full-stack developer by mastering React, Rails, and devops (in that order). I'm interested in learning GoLang as well, but it isn't a huge priority.

---

I've freelanced for **Scholastic** doing design work; **World Vision Charities** creating a custom multi-user WordPress blog platform; and hundreds of other web-development odd jobs in-between.

I've worked for **MojoTech** doing Rails work (mostly along the Asset Pipeline, but I can get around); **Grist** creating mini-sites for various campaigns; and **TutsPlus** writing/recording tutorials and courses on a variety of frontend technologies.

I'm happy to do programming challenges to make sure I'm a good fit with your company.

Thanks for taking the time to read this and consider me.
